Loxo Oncology to Present Pre-Clinical Data on LOXO-101 at Upcoming EORTC-NCI-AACR Symposium

October 30, 2014

STAMFORD, Conn., Oct. 30, 2014 (GLOBE NEWSWIRE) -- Loxo Oncology, Inc. (Nasdaq:LOXO), a biopharmaceutical company focused on developing targeted cancer therapies for genetically-defined populations, today announced it will present pre-clinical data on the Company's pan-TRK inhibitor candidate, LOXO-101, in a poster session at the 26th EORTC-NCI-AACR Symposium on Molecular Targets and Cancer Therapeutics taking place in Barcelona, Spain on November 18-21, 2014.

The details of the poster session are as follows:

**Poster Session Title:** Molecular Targeted Agents I  
**Date:** November 20, 2014  
**Poster Viewing Session:** 18:00-19:30 (CET)  
**Location:** Exhibition Hall  
**Poster Number:** P171  
**Title:** LOXO-101, a pan TRK inhibitor, for the treatment of TRK-driven cancers (Abstract #391)  
**Authors:** S. Winski, B. Baer, D. Hartley, S. Rhodes, R. Wallace, S. Smith, N. Nanda, L. Kunkel, P. Lee, K. Bouhanna

**About Loxo Oncology**

Loxo Oncology develops targeted small molecule therapeutics for the treatment of cancer in genetically defined patient populations. Loxo's development approach translates key scientific insights relating to the oncogenic drivers of cancer into drugs that are potent and highly selective for their intended targets. This approach is intended to allow for the development of drugs with a high probability of clinical success while reducing the time, costs and risks of drug development. Loxo Oncology derives its company name from an attendant of the Greek goddess Artemis, who represented the concept of trajectory in the sport of archery.
